

The **PROJECTOR LIFT VP300** is studied in order to support large and heavy video projectors up to 30 Kg of weight and offers a long stroke with a maximum extension of 300 cm. The lift is developed to be installed inside a false ceiling in order to hide the projector, lift and cables, thus granting the best aesthetic and practical solution. The VP300 is supplied with an extremely silent motor that allows a descent from a minimum of 40,5 cm to a maximum of 300 cm. Moreover, it is supplied with extendable side brackets in order to allow an easy fixing of the panel of your false ceiling by adjustable threaded bars. The panel can be mounted under the projector, even if the projector is larger as the lift itself. The lift VP300 is equipped with **safety screws**, which prevent the lift to extent further to the preset end stop in case of failure.

** Ceiling cover plate is **NOT** included*
